

IMRAN WAFI

NOC Technician | Data Analyst

Washington, DC • imran.h.wafi@gmail.com • 703-364-9357 • www.imranwafi.com

PROFILE SUMMARY

Network operations technician and Analyst for 5+ years, expertise in DB management, DC/NOC infrastructure monitoring and DataQ engineering. Hands on experience installing racks/blades/GPU/HCI servers, maintaining, and troubleshooting in a 24/7 prod environment, alongside all the networking, power, and cooling. Upkept and maintain strict SLA targets, very competent with Linux, SAN/NAS, RAID, incident response, and structured cabling. Ability to read and create documentation and SOPs including ones without a determined solution path. Team oriented with the ability for cross team collaboration.

CORE

DC/NOC & Hardware: Server install / rack and stack, component diagnostics, repair, cabling, and hardware lifecycle (deploy, RMA, decommission)

Systems & Networking: Linux, System troubleshooting, networking protocols, switches and routers, monitoring and alerting

Operations: NOC/DC monitoring, incident response and escalation, SLA / uptime management, ticketing (MostJira), runbooks & on-call shift coverage

Data & Reporting: Python, SQL, Power BI, Excel, ETL, KPI dashboards, performance and capacity reporting

Cloud & Tools: AWS, Snowflake, Data Warehousing, Agile delivery, knowledge transfer and process documentation

PROFESSIONAL EXPERIENCE

NOC Technician | Petromax LLC

AUG 2024 – DEC 2025

Washington, DC / Ashburn, VA

- Maintained and monitored network servers and other hardware infrastructure in operational multi facilities in all day all week environments, as well as certain work day only environments.
- Closed multiple tickets with hands on operations; server stack & racks, structured cabling, component health checks and diagnostics across multiple production environments
- Managed incident response and ticketing for network and hardware outages, coordinating with engineering teams to triage, escalate, and resolve issues within SLA targets.
- Optimized MTTD by roughly a third across my managed network and infrastructure by automated alerting to surface anomalies and issues early.
- Created dashboards tracking uptime, overall performance KPIs, and alert resolution metrics, giving high level leadership clear insight and near real time reports.
- Created and Co-created operational runbooks, escalation procedures, and knowledge transfer documentation to standardize incident handling across shifts.

Data Analyst | Instawire LLC

DEC 2021 – JUL 2024

McLean, VA

Federal Government / Anti-Money Laundering

- Analyzed large datasets to identify anomalies, duplicate records, and suspicious patterns.
- Built Power BI dashboards surfacing pattern, frequency, and severity metrics to support remediation prioritization.
- Designed clustering and grouping logic to surface high risk records, improving duplicate detection accuracy by a decent margin.

Credit Bureau / Credit Risk, Fraud Detection, Customer Analytics

- Built data models and transformation logic across large credit and behavioral datasets, with interactive dashboards to prioritize high risk records.
- Implemented data quality frameworks, validation logic, and automated refresh processes with technical and governance teams.

Data Specialist | MGTwell LLC

OCT 2020 – NOV 2021

Alexandria, VA

- Processed and analyzed large scale datasets, ensuring accuracy and integrity for business reporting.
- Developed automated cleansing and deduplication procedures, improving data quality across reporting systems.
- Built ETL workflows to extract, transform, and prepare data for analytical reporting.

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Data Analytics, In progress
- Google IT Support / Data Analytics Certificate, Google
- CompTIA Certificate, CompTIA
- AI & Machine Learning Certificate, AI Academy
- Goldman Sachs Data Certificate
- JPMorgan Chase Software Certificate
