

IMRAN WAFI

NOC Technician | Data Analyst

Washington, DC • imran.h.wafa@gmail.com • 703-364-9357 • www.imranwafa.com

PROFILE SUMMARY

NOC technician and data analyst with 5+ years across network operations, infrastructure monitoring, and data analytics. Hands-on experience installing, maintaining, and troubleshooting server and network systems in 24/7 production environments while meeting strict uptime and SLA targets. Comfortable with Linux, hardware and component-level diagnostics, structured incident response, and ticketing workflows. Strong documentation and cross-team collaboration skills, with a track record of reducing downtime, improving detection speed, and keeping mission-critical systems running. Open to shift-based, weekend, and on-call schedules.

CORE COMPETENCIES

Data Center & Hardware: Server install / rack & stack, component-level diagnostics & repair, cabling, hardware lifecycle (deploy, RMA, decommission)

Systems & Networking: Linux, OS troubleshooting, networking protocols (TCP/IP, DNS, DHCP), switches / routers, monitoring & alerting

Operations: NOC monitoring, incident response & escalation, SLA / uptime management, ticketing (Jira), runbooks & on-call shift coverage

Data & Reporting: SQL, Python, Power BI, Excel, ETL/ELT, KPI dashboards, performance & capacity reporting

Cloud & Tools: AWS, Snowflake, Data Warehousing, Agile delivery, knowledge transfer & process documentation

PROFESSIONAL EXPERIENCE

NOC Technician | Petromax LLC

AUG 2024 – DEC 2025

Washington, DC

- Monitored and maintained network infrastructure and server hardware across multiple operational facilities in a 24/7 environment, sustaining ~99.9% availability and minimal unplanned downtime.
- Performed hands-on hardware operations: server rack & stack, structured cabling, health checks, and component-level diagnostics across production server and network environments.
- Managed incident response and ticketing for network and hardware outages, coordinating with engineering teams to triage, escalate, and resolve issues within SLA targets.
- Implemented automated monitoring and alerting to surface anomalies early, cutting mean time to detection (MTTD) by roughly 30% across network and infrastructure layers.
- Built NOC dashboards tracking uptime, network performance KPIs, and alert-resolution metrics, giving senior leadership clear real-time visibility.
- Authored operational runbooks, escalation procedures, and knowledge-transfer documentation to standardize incident handling across NOC shifts.

Data Analyst | Instawire LLC

DEC 2021 – JUL 2024

McLean, VA

Federal Government / Anti-Money Laundering

- Analyzed large-scale datasets (\$2B+ daily transaction volume) to identify anomalies, duplicate records, and suspicious patterns.
- Built Power BI dashboards surfacing pattern, frequency, and severity metrics to support remediation prioritization.
- Designed clustering and grouping logic to surface high-risk records, improving duplicate-detection accuracy by ~23%.

Experian / Credit Risk • TransUnion / Fraud Detection • Equifax / Customer Analytics

- Built data models and transformation logic across large credit and behavioral datasets, with interactive dashboards to prioritize high-risk records.
- Implemented data-quality frameworks, validation logic, and automated refresh processes with technical and governance teams.

Data Specialist | Mgtwell LLC

OCT 2020 – NOV 2021

Alexandria, VA

- Processed and analyzed large-scale datasets, ensuring accuracy and integrity for business reporting.
- Developed automated cleansing and deduplication procedures, improving data quality across reporting systems.
- Built ETL workflows to extract, transform, and prepare data for analytical reporting.

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Data Analytics, In progress
- Google IT Support / Data Analytics Certificate, Google
- CompTIA Certificate, CompTIA
- AI & Machine Learning Certificate, AI Academy
- Goldman Sachs Data Certificate
- JPMorgan Chase Software Certificate
